Registrations

Registered Geotechnical Engineer in California, GE 3005
Registered Professional Civil Engineer in California, PE 73401

Certifications

OSHA 40-Hour HAZWOPER Certified
Nuclear Gauge/Troxler, No. 2125417
USACE Levee Inspection Trained

Education

M.B.A., California State University, Northridge, 2020
M.S., Geotechnical Engineering, University of California, Los Angeles, California, 2005
B.S., Civil Engineering, Colorado State University, Fort Collins, 2003

Representative Experience

Mr. Janousek is a registered California Professional and Geotechnical Engineer with over 20 years of experience in geotechnical studies, including: field exploration, laboratory testing, engineering analyses and reporting, plan review, and construction observation. He has extensive experience with a variety of municipal projects related to new and rehabilitated infrastructure including levees, roadways, bridges, pipelines, and water tanks (e.g., above-ground and buried reservoirs). He has also coordinated field work for residential, commercial, and public buildings; medical, corrections facilities, airports, roads, and bridges; and military, power, and recreational facilities.

Mr. Janousek's technical background includes evaluation of seepage, slope stability, settlement, shallow and deep foundation design, compressible and expansive soils, and liquefaction potential. He also has extensive experience on construction sites, from observation of grading and compaction activities to installation of deep foundations and various ground improvement alternatives.

MATTHEW J. JANOUSEK (cont.)

Mr. Janousek has performed hundreds of geotechnical peer reviews between the Cities of Santa Monica and Rancho Palos Verdes. He also has performed thousands of peer reviews for the City of Malibu's Environmental Sustainability Department, including Environmental Health and Geotechnical peer reviews.

Mr. Janousek's project management experience includes: tracking budget and schedule; directing, monitoring, and controlling technical work; preparing technical reports, bid packages, and cost estimates; providing leadership to the team throughout the project; and ensuring delivery of high-quality products.
